ABHINAV SINGH CHAUHAN

AWS DevOps Engineer

(+91) 8130510011 | cool.abhi@outlook.com | github.com/MYSTYX7 | linkedin.com/in/abhisc

SUMMARY

AWS DevOps Engineer with **4+ years of experience** designing, automating, and operating **production-grade cloud infrastructure** on **AWS** and **Azure**. Proven track record of **reducing provisioning time by 30%**, **improving MTTR by 30%**, and **maintaining 99.9% uptime** across Kubernetes-based workloads. Specialized in **Terraform IaC**, **EKS**, **CI/CD pipelines**, **GitOps workflows**, and **DevSecOps practices**. Adept at owning infrastructure end-to-end from architecture to monitoring across Agile teams.

TECHNICAL SKILLS

AWS Services	EC2, S3, VPC, IAM, ELB, Lambda, CloudWatch, CloudTrail, EKS, ECR, Cost Explorer, Secrets Manager
Infrastructure-as-Code	Terraform
CI/CD Pipeline	Jenkins, ArgoCD, GitHub Actions, Git/GitOps
Containers & Orchestration	Docker, Kubernetes + Helm (Blue/Green Deployments, HPA, RBAC)
Monitoring & Observability	Prometheus, Grafana + Loki, Splunk
Configuration Management	Ansible, SaltStack
Scripting	Bash, Python, JavaScript
Databases	Aerospike, MySQL, PostgreSQL, MongoDB, MariaDB
Operating System	Linux Administration (KVM & QEMU), Windows
DevSecOps	SonarQube, Trivy

WORK EXPERIENCE

Independent AWS Cloud DevOps Consultant **(Remote) Apr 2024 – Jan 2026**

- Delivered **10+ contract engagements** for startups and SMBs across **SaaS** and **fintech domains**, designing and automating **end-to-end AWS infrastructure** using **Terraform** to support **Agile SDLC** and rapid iteration.
- Built and optimized **CI/CD pipelines** using **GitHub Actions** and **Jenkins**, enabling continuous integration and deployment of **Dockerized applications** to **AWS EKS**, with hands-on cluster management including **auto-scaling, RBAC,** and **NGINX Ingress**.
- Designed and provisioned **hybrid cloud environments** spanning **AWS** and **Azure** for multi-cloud clients, using **Terraform modules** to standardize IaC across both providers and reduce **cross-cloud configuration drift**.
- Supported production operations on a contract basis, implementing **monitoring, logging,** and **incident troubleshooting** using **Prometheus, Grafana,** and **CloudWatch**, alongside **AWS cost optimization** initiatives across client environments.

AlmaBetter | *AWS DevOps Engineer (Full-time)* **(Bengaluru) Jan 2023 – Feb 2024**

- Built and maintained **AWS infrastructure** (**EC2**, **S3**, **VPC**, **IAM, Secrets Manager**) improving system security and **increasing network performance by ~20%** through **VPC** optimization.
- Standardized **Infrastructure-as-Code (IaC)** using **Terraform** across **multi-environment deployments**, **reducing provisioning time by ~30%** and eliminating configuration drift.
- Utilized **Prometheus** and designed **Grafana** dashboards for **Kubernetes cluster monitoring** using pod metrics and logs, improving alert visibility and **improving MTTR by ~30%** through **real-time alerting visibility**.
- Stabilized **Kubernetes deployments** on **AWS EKS** by implementing **Helm-based releases**, Horizontal Pod Autoscaling (HPA), liveness/readiness probes, **RBAC policies**, and controlled rollout strategies, **improving service resiliency** and **deployment reliability**.
- Authored **20+ operational runbooks**, accelerating onboarding **productivity by ~50%** and improving **issue resolution consistency**.
- Conducted detailed **log reviews** and **system health checks** during deployments, on-call rotation, and outages, ensuring **~99.9% uptime** for **production workloads** in adherence to **production SLA targets**.

AT & Co. | *Fullstack Engineer* **(Remote) Jan 2022 – Dec 2022**

- Deployed scalable web applications using **AWS Lambda** and **API Gateway**, reducing page load times by **~35%**.
- Optimized **Jenkins CI/CD pipeline deployment** automation, reducing manual effort and **cutting deployment time by ~30%**, performed detailed **log analysis**, **reducing incident resolution time by ~15%**.
- Automated repetitive operational tasks with **Ansible**, improving deployment reliability and **lowering configuration errors by 40%**.

PERSONAL PROJECTS

Salt4Loki (Grafana Loki Installation with SaltStack) (GitHub)

- Scripted full automation for **Grafana Loki deployment** across **10+ production servers** using **Salt Master-Minion architecture**, reducing **manual setup time by ~80%** and cutting **deployment errors to zero** across all nodes.
- Implemented **high-availability ring topology** via Salt states, improving **log ingestion reliability by ~40%** and enabling **consistent, repeatable provisioning** eliminating ad-hoc server configuration entirely.

Particle41 (EKS with Terraform) (GitHub)

- Built and deployed a **containerized microservice** on **AWS EKS** using **Terraform** and **Kubernetes**, following **production-grade GitOps architecture** with full separation of app code, infrastructure, and Kubernetes manifests.
- Provisioned end-to-end **AWS infrastructure (VPC, EKS, IAM, RBAC)** via **Terraform**, enabling repeatable **blue/green deployments** and reducing **environment spin-up time from hours to under 15 minutes**.

CERTIFICATIONS

Certified Solutions Architect - Associate (AWS SAA) | *Amazon Web Services (AWS)* (Verify Credentials)

Certified Terraform Associate (HCTA0-003) | *HashiCorp* (Verify Credentials)

PG Certification in Cloud Computing & DevOps | *Indian Institute of Technology, Roorkee* (Verify Credentials)

EDUCATION

Cloud Computing & DevOps Executive Program
Indian Institute of Technology, Roorkee — Jul 2024 – Jun 2025

B. Tech. (Electrical & Electronics Engineering) — **8.23 CGPA**
Guru Gobind Singh Indraprastha University, Delhi — Aug 2016 – Jul 2020
