ABHINAV SINGH CHAUHAN

AWS DevOps Engineer

(+91) 8130510011 | cool.abhi@outlook.com | github.com/MYSTYX7 | linkedin.com/in/abhisc

SUMMARY

AWS Solutions Architect Associate & **HashiCorp Terraform Associate** with experience in building **AWS & Azure Cloud infrastructure**, automation workflows, and cloud-native deployments. Skilled in **CI/CD pipelines**, **Terraform**, **Saltstack**, **Ansible**, **Kubernetes**, **Docker**, **Linux** and dashboard monitoring with **Prometheus & Grafana**, and **Splunk** focused on improving reliability, speeding deployments, and cloud automation.

TECHNICAL SKILLS

AWS Services	EC2, S3, VPC, IAM, ELB, Lambda, CloudWatch, EKS
Infrastructure-as-Code	Terraform
CI/CD Pipeline	Jenkins, ArgoCD, GitHub Actions
Containers & Orchestration	Docker, Kubernetes + Helm
Monitoring & Observability	Prometheus, Grafana + Loki, Splunk
Configuration Management	Ansible, SaltStack
Scripting	Bash, Python, JavaScript
Databases	Aerospike, MySQL, PostgreSQL, MongoDB, MariaDB
Operating System	Linux (KVM & QEMU), Windows

WORK EXPERIENCE

Freelance | *Cloud & AWS DevOps Consultant* **(Remote) Apr 2024 – May 2026**

- Delivered **project-based AWS infrastructure solutions** for startups and small teams, designing and **automating** cloud environments using **Terraform** to support **Agile SDLC** and rapid iteration.
- Engaged with multiple clients to **build** and **optimize CI/CD pipelines** using **GitHub Actions** and **Jenkins**, enabling continuous integration and deployment of **Dockerized applications** to **Amazon EKS**.
- Provided **hands-on Kubernetes (EKS) consulting**, managing cluster setup, deployments, auto-scaling, RBAC, and **NGINX Ingress**, while collaborating with developers during **Agile sprint cycles**.
- Supported **production operations on a contract basis**, implementing **monitoring**, **logging**, **incident troubleshooting**, and **AWS cost optimization** using **Prometheus**, **Grafana**, and **CloudWatch**.

AlmaBetter | *AWS DevOps Engineer (Full-time)* **(Bengaluru) Jan 2023 – Feb 2024**

- Built and maintained **AWS infrastructure** (**EC2**, **S3**, **VPC**, **IAM**) improving system security and **increasing network performance by ~20%** through **VPC** optimization.
- Standardized **Infrastructure-as-Code (IaC)** using **Terraform** across **multi-environment deployments**, **reducing provisioning time by ~30%** and eliminating configuration drift.
- Utilized **Prometheus** and designed **Grafana** dashboards for **Kubernetes cluster monitoring** using pod metrics and logs, improving alert visibility and **improving MTTR by ~30%** through **real-time alerting visibility**.
- Stabilized **Kubernetes deployments** on **AWS EKS** by implementing **Helm-based releases**, Horizontal Pod Autoscaling (HPA), liveness/readiness probes, **RBAC policies**, and controlled rollout strategies, **improving service resiliency and deployment reliability**.
- Authored **20+ operational runbooks**, accelerating onboarding **productivity by ~50%** and improving **issue resolution consistency**.
- Conducted detailed **log reviews** and **system health checks** during deployments, on-call rotation, and outages, ensuring **~99.9% uptime** for **production workloads**.

AT & Co. | *Fullstack Engineer* **(Remote) Jan 2022 – Dec 2022**

- Deployed scalable web applications using **AWS Lambda** and **API Gateway**, reducing page load times by **~35%**.
- Optimized **Jenkins CI/CD pipeline deployment** automation, reducing manual effort and **cutting deployment time by ~30%**, performed detailed **log analysis**, **reducing incident resolution time by ~15%**.
- Automated repetitive operational tasks with **Ansible**, improving deployment reliability and **lowering configuration errors by 40%**.

PERSONAL PROJECTS

Salt4Loki (Grafana Loki Installation with SaltStack) (GitHub)

- Scripted automation for **Grafana Loki deployment across 10+ servers** using Salt Master–Minion architecture for **HA deployment**, reducing manual setup time by **~80%**.
- Executed **high-availability ring topology** configuration via Salt states, **improving log ingestion reliability by ~40%** and ensuring consistent, repeatable provisioning.

Particle41 (EKS with Terraform) (GitHub)

- Built and deployed a **containerized microservice on AWS EKS** using **Terraform and Kubernetes**, following **production-grade architecture** and best practices.
- Implemented **infrastructure provisioning (VPC, EKS, IAM)** and **Kubernetes deployments** with **Terraform**, enabling repeatable and consistent deployments.
- Structured the project to **separate application code**, infrastructure, and **Kubernetes deployment**, **improving maintainability and scalability**.

CERTIFICATIONS

Certified Solutions Architect - Associate (AWS SAA) | *Amazon Web Services (AWS)* (Link)
Certified Terraform Associate (HCTA0-003) | *HashiCorp* (Link)
PG Certification in Cloud Computing & DevOps | *Indian Institute of Technology, Roorkee* (Link)

EDUCATION

Cloud Computing & DevOps Executive Program
Indian Institute of Technology, Roorkee — Jul 2024 – Jun 2025

B. Tech. (Electrical & Electronics Engineering) — **8.23 CGPA**
Guru Gobind Singh Indraprastha University, Delhi — Aug 2016 – Jul 2020
